Summary

Problem

The U.S. Air Force Medical Support Agency, Surgeon General Support Logistics Office (AFMSA/SGSLX) requested that the Naval Health Research Center (NHRC) conduct a proof-of-concept study to assess the validity and feasibility of using NHRC's Estimating Supplies Program for the development and management of Air Force medical Allowance Standards (AS). The Global Reach Laydown (GRL) Unit Type Code (UTC) AS was selected as the final of three Air Force UTCs for this study. The goal of this final UTC study was the development of an inventory validation process using NHRC's modeling database. Previous modeling efforts for Air Force UTCs involved the Mobile Forward Surgical Team and the Critical Care Air Transport Team.

Objective

The primary objective of this study was to provide the Air Force with the ability to validate the clinical and preventive medicine (PM) requirements of the GRL assemblage, with the goal of using the NHRC medical model and database to establish a viable audit trail linking clinical requirements with supply items.

Approach

This study was accomplished in two phases. The first phase entailed discussion with a subject matter expert (SME) panel and Manpower and Equipment Force Packaging (MEFPAK) Managers to better understand mission capability requirements in order to (1) understand the operating environment in which the AS is employed, (2) determine the level of care the AS is supposed to support, (3) develop the range of patient conditions (PCs) and nonclinical procedures the AS must be capable of supporting, and (4) better understand its mission scope. Concurrently, NHRC began dialogues with the SME panel and MEFPAK Managers to determine probabilities and frequencies for each PC and PM task.

Following NHRC's process of modeling clinical requirements for field medical facilities, we used its Estimating Supplies Program (ESP) database of medical task and supply profiles as a template and completed the relational mapping of PCs to clinical task protocols, medical equipment and supplies, and identified 120 clinical, PM, and nonclinical tasks required by the GRL mission.

Results

The most significant result of this effort was mapping and aligning GRL equipment and supplies to joint materiel solutions and the clinical requirement those items satisfy. This joint solution calls for tasks and supplies for systems needed to provide medical services at a defined level of care, for the GRL level I-II. There were shortfalls in the array of tasks required for this level of care, most notably those associated with nasogastric insertion and suction, chest tube suction, and cardiopulmonary resuscitation. When a required task did not have supplies and equipment in the GRL inventory, they were added to the model.

The mapping was accomplished by identifying direct matches, alternates, and substitutes from the GRL inventory to line items in the Battalion Aid Station, Sick Call, Surgical Company, and PM functional areas. (FAs). The joint solutions were derived from PC, task ,and required supplies and equipment relationships from the relational database in ESP. GRL equipment and supplies mapped to the joint solution in these databases has yet to be vetted by the SME panel. Once these recommended changes are either accepted or rejected by the SME panel, a final inventory can be forwarded for approval.

Another result of this effort was the comparison of the weight, cube, and cost of the inventory after simulation. The inventory simulation was based on the low unit measure consumption of supplies and equipment. The low unit of measure in this case is the smallest unit in which a packaged item is delivered. For instance, many injectable medications are provided in vials in 12 -vial packages. In this example, the low unit of measure is 1 vial. Using this convention, there was a 30% increase in weight and 6% in cost, due to packaging consumables and medications in high-volume packages and adding additional items for those required tasks to the inventory.

Discussion and Conclusion

Using the relational databases in ESP enabled the team to determine joint materiel solutions for the GRL at the level of care appropriate for this system's configuration. This ensured inventory items were mapped to clinical requirements within the GRL scope of care and PM services.

Using a patient stream and PM task frequencies that reflected the GRL mission and its concept of employment, ESP generated an appropriate supply list. The unit of measure (UM), unit of issue (UI), weight, cube, and cost were then compared with those in the current GRL AS.

Using ESP as a management tool to configure allowance standards is invaluable. The program allows planners to calculate the required configuration for UTCs based on a system's clinical requirements and consumption of inventory line items. The program enables Managers to identify specific PCs, tasks, and supplies required. This tool can also be used in AS modernization because it enables SMEs to identify stock levels for specific tasks and treatment profiles for a given PC. In an effort to create leaner, smaller, and lighter allowance standards, treatment profiles and associated materiel can be tailored to satisfy a specific mission or used to determine which PC, task, or associated supply is critical. Noncritical tasks can be deleted from treatment profiles and noncritical supplies can be removed from tasks. All efforts in this modeling and simulation result in optimized inventories for expeditionary UTCs.

iv

Introduction

Background

The US Armed Services are developing military medical systems to satisfy the Joint Chiefs of Staff's *Vision 2010* concept of providing greater expeditionary mobility and dispersion with a smaller logistical footprint. To accomplish this, a more precise and efficient method for determining medical readiness capabilities is needed.

Under the aegis of the Marine Corps Systems Command, NHRC developed a medical requirements model and supporting database consisting of clinical tasks mapped to the supplies required to complete those tasks. This model and its database were used to develop such Marine Corps medical capabilities as the Forward Resuscitative Surgical System (FRSS) ² and the En Route Care System (ERCS)³. It was also used to validate the Air Force's Mobile Forward Surgical Team (MFST)⁴ and Critical Care Air Transport Team (CCATT) Allowance Standard.⁵ The database is also a primary source of data for the joint Common User Database developed by the Defense Medical Standardization Board (DMSB) for clinical tasks at Levels I and II of battlefield care.

The AFMSA/SGSLX requested that NHRC conduct a proof of concept study to assess the validity and feasibility of integrating the use of ESP in Air Force AS development and management. The task was to develop the GRL using NHRC's underlying relational database structure (Figure 1), which outlines the associations made between PCs, tasks, and related supplies, in this case, for PC 166, a multiple injury wound involving penetrating wounds to the chest and kidney. Knowing which PCs the GRL treats would lead to tasks, and ultimately, a workable inventory of supplies.

| PC Code | Level of Care | Functional Area | Task | % of Patients | Supplies |
|------------|---------------------|------------------------|---------------------------------|---------------|---|

Figure 1. Modeling Relational Database Structure for Clinical Tasks

Preventive Medicine Objectives (PMOs) were modeled with associated supplies and equipment, as depicted in Figure 2. Task frequencies, determined using

SME input, are largely dependent on population at risk (PAR) size and the inherent disease risk for a given area of operations. SME recommendations were based on deploying with a full complement of 300 personnel for a 30-day period in an operational setting with minimal host-country infrastructure and PM assets.

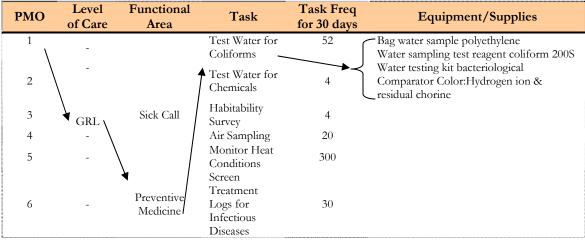

Figure 2. Modeling Relational Database Structure for Preventive Medicine Tasks

Global Reach Laydown Capabilities

The GRL's capabilities are designed to reduce the impact of disease and nonbattle injuries on contingency operation missions, and to provide limited medical support. The GRL deploys with Tanker Airlift Control Elements (TALCE) or Mission Support Teams (MSTs), and assesses health risks associated with environmental and occupational health hazards. The GRL provides the war fighter with capabilities, in support of establishing a potential main operating base in a forward deployed location. The specific capabilities are:

- Provides medical input into proper lay-down of installation facilities
- Determines adequacy of local billeting and public facilities
- Evaluates local medical capabilities
- Recommends locations for medical facilities
- Evaluates safety and vulnerability of local food and water sources
- Assesses occupational and environmental hazards
- Performs vector/pest risk assessment
- Provides medical intelligence
- Performs epidemiological risk assessment
- Performs initial nuclear, biological, and chemical and emergency response planning
- Provides limited medical support

The GRL consists of four personnel: an Aerospace Medicine Specialist, a Bioenvironmental Engineer, a Public Health Officer, and an Independent Duty

Medical Technician. The team is designed for mobility so it can provide timely clinical and PM support to meet the operational needs of the TALCE/MST.

Methodology

The NHRC method of modeling medical materiel requirements was developed to establish and/or review Authorized Medical Allowance Lists (AMALs) for various levels of care in the Navy and Marine Corps. Its aim is to give medical personnel in the fleet or the field the materiel they need to provide the best possible care, while maintaining the minimal logistical footprint mandated by current Navy and Marine Corps doctrine. An SME panel rigorously reviews and vets each step of this process, to ensure every AMAL meets the operational and medical needs of the service.

The ESP database was derived from Time, Task, Treater (TTT) files originally developed by DMSB for Level 3 military treatment facilities (MTFs). NHRC adapted the Time, Task, Treater files to model both Navy and Marine Corps Level 1 and 2 facilities, updating ESP data monthly to reflect changes in medical equipment and supplies. FAs within each level of care are also routinely updated, using SME input and military medical lessons-learned data, to remain current with changes in field care and joint doctrine. As a result, NHRC is the primary contributor of Level 1 and 2 data to the DMSB Common User Database, the reason we chose NHRC's ESP database as the primary data source for this study (telephone conference with DMSB, AFMSA/SGSLX. and NHRC, 7 July 2005). A comprehensive description of ESP's background, capabilities, uses, frequently asked questions, and download link is available (http://www.nhrc.navy.mil/programs/esp/index.html).

The GRL model has two FAs, sick call, and PM. Using two FAs from separate systems in ESP, the assessment objective was to document the clinical and PM capability of the existing UTC configuration, and validate the associated medical supplies and equipment required to support GRL operational needs. This effort was addressed in two phases.

Phase I

Phase I of the process documented GRL clinical capability requirements, based on the system's operational requirements. This involved reviewing Air Force requirement documents, such as the Mission Capability, Tactics, Techniques and Procedures, Mission Essential Task List, and other pertinent documents.

During Phase I, there were facilitated discussions with clinical and PM SMEs and the USAF MEFPAK Managers, to develop a detailed profile of PCs, PMOs, and clinical and PM procedures the GRL must support. These discussions also ensured a broad-based understanding of the entire GRL medical system and identified its inherent capabilities. A list of the SMEs appears in Appendix A.

Patient Conditions and Preventive Medicine Objectives

PCs and PMOs were selected from Marine Corps clinical and PM systems with mission capabilities similar to those of the GRL, namely the Battalion Aid Station and the Surgical Company PM systems. The GRL SMEs agreed that the 318 PCs and 10 PMOs were within both the scope of care and services required by the mission statement and the GRL concept of operations. Appendix B is a complete list of those PCs and PMOs.

Task List

The NHRC database has 120 clinical, PM, and nonclinical tasks at this level of care for sick call and PM FAs. A complete list of tasks for the GRL is provided in Appendix C.

Patient Stream Generation

Discussion with GRL SMEs determined that the GRL system could expect to treat an average of 80 new patients within its 30-day mission. The NHRC Patient Stream Generator determined which of the identified PCs the GRL was most likely to see.

The PCs listed in Appendix D were derived from the 80th percentile of the list after 100 iterations, ensuring with high statistical probability that all PCs were present in the patient stream at least once. Note that the attachment lists more than the proscribed 80 patients. This is due to the patient generator's random sampling, which, by capturing most of the GRL's required tasks, guarantees a more robust patient stream. When tasks were not captured, supplies and equipment required to perform them once were added, and these tasks are listed in Table 1.

Table 1.

Tasks Not Found in the Patient Stream

| Task No. | Task Description |
|----------|---|
| 007 | Emergency Cricothyroidotomy |
| 063 | Venous Cutdown |
| 076 | Gastric Lavage |
| 079 | Catheterization, Foley |
| 121 | Eye Irrigation |
| 123 | Eye Care (Dressings/Eye Patch) |
| 124 | Ear Care Irrigation |
| 802 | Initial/Subsequent Non-Surg Debride of Burn or Open Wound |
| A6 | Apply Tourniquet |
| D294 | Sedative Filling |
| Z094 | Extremity Traction, Application/Adjust |
| ZZ02 | Stain Eyes (Fluorescein Stain/Woods Lamp) |

Preventive Medicine Task Frequency

Assigning task frequencies for PM tasks is different from determining clinical task frequencies, since no equivalent of a patient stream generator exists for PMOs. Historically, NHRC has modeled PM supply requirements based on planning for "worst-case scenarios." This ensured that the PM inventory would be populated with adequate consumable levels even if the system deployed to an environment with a limited or nonexistent public health infrastructure. The frequency with which these tasks are performed is generally based on the PAR and the environment in which the system is deployed.

The PM SMEs provided input based on whether the task is performed daily, weekly, or only once during a deployment. For instance, chlorine testing is done daily. Given a worst-case scenario, that of a GRL supporting a full complement of personnel in an area with little public health infrastructure, the SMEs predicted what type of water sampling would be completed and how often. The PM task frequency matrix appears in Appendix E.

Phase II

In Phase II, those clinical tasks required to treat each PC from Phase I of the study were identified. ESP links each task to those supplies required to complete it one time. The supplies vary according to level of care and FA. The task-supply profiles were compared with the GRL inventory, and direct matches, alternates, and substitutes were identified. A direct match was an National Stock Number (NSN) match. Alternatives were defined as supply items with identical nomenclature, but different strengths or units of issue. A substitute was defined as a different product with similar properties or clinical actions. Alternates and substitutes are listed as potential replacement items in the inventory. GRL inventory supplies and equipment and line items pulled from ESP were compiled and categorized in the following manner:

- **A.** Current GRL Component Delete/Sub: The NSN listed is currently in the GRL, but is recommended for deletion and replacement by another NSN.
- **B.** Current GRL Component Retain Level Increase: The NSN listed is currently in the GRL, is retained and the model recommends increasing the quantity (same UI as currently in the GRL).
- **C.** Current GRL Component Retain Level Decrease: The NSN listed is currently in the GRL, is retained, and the model recommends decreasing the quantity (same UI as currently in the GRL)
- **D.** Current GRL Component Retain (Convert to Low Unit of Measure (LUM) UI): The NSN listed is currently in the GRL, is retained, and the model recommends converting the UI to a LUM quantity in the assemblage.

- **E.** Current GRL Component Retain No Change: The NSN listed is currently in the GRL and no change is required.
- **F. Current GRL Component Delete:** The NSN listed is currently in the GRL, and is recommended for deletion with no replacement required.
- **G.** New GRL Component Replacement Item: The NSN listed is not currently in the GRL, and is a replacement for an existing GRL NSN.
- **H. New GRL Component:** The NSN listed is not currently in the GRL and is recommended as a new item.

There were 479 line items categorized for this study. The number of items and percentages for the subsets categorized A–H are provided in Table 2. Categories A and G are linked because Category A is the GRL item recommended for deletion and replacement by the Category G item, which is an ESP line item representing a materiel solution that is standard across the branches of service. Categories B, C, E, and F are all current GRL items for which ESP recommended a quantity increase, decrease, no change, or deletion. Category D lists all current GRL items for which there is a recommended packaging change from UI to UM. Category H represents new items recommended to satisfy new tasks and capabilities appropriate for this level of care. Appendix F provides a complete list of these line items.

Table 2
Percent Category

| Category | Number | Percent |
|----------|--------|---------|
| Α | 69 | 14.68 |
| В | 20 | 4.26 |
| С | 62 | 13.19 |
| D | 9 | 1.91 |
| E | 149 | 31.70 |
| F | 5 | 1.06 |
| G | 70 | 14.89 |
| Н | 86 | 18.30 |
| Total | 470 | 100 |

Results

As a result of the SME input and their clinical and PM guidance, a model was built using the GRL inventory and the supplies and equipment for new tasks. Additionally, a patient stream was prepared and PM task frequencies were identified to complete the simulation effort for this inventory.

For this study, an analysis of the impact of the patient stream was conducted using the low UM. When the results of the patient stream were studied using this convention, an increase in overall cost and weight was apparent. This is due primarily to addition of those items added for required tasks not previously satisfied by the inventory. These items alone totaled \$7,673.08 (10.9%) and weighed 191.02 pounds (11.4%). Table 3 displays the supply requirements for this patient stream.

Table 3
Low Unit of Measure (UM)

| Category | Weight | Cube | Cost |
|--------------------|----------|---------|-------------|
| Current equipment | 490.104 | 95.077 | \$44,674.54 |
| Revise equipment | 585.384 | 103.377 | \$51,694.85 |
| Difference | 95.280 | 8.300 | \$7,020.31 |
| Percent change | 19.441 | 8.730 | 15.7143 |
| Current medication | 232.100 | 28.045 | \$7,835.54 |
| Revise medication | 217.304 | 18.461 | \$5,829.63 |
| Difference | -14.796 | -9.584 | -\$2,005.91 |
| Percent change | 29.700 | 55.628 | 40.8281 |
| Current consumable | 588.808 | 52.262 | \$8,449.32 |
| Revise consumable | 785.768 | 88.735 | \$11,891.87 |
| Difference | 196.960 | 36.473 | \$3,442.55 |
| Percent change | 33.451 | 69.789 | 40.7435 |
| Current durables | 71.350 | 8.320 | \$636.65 |
| Revise durables | 73.050 | 20.955 | \$662.71 |
| Difference | 1.700 | 12.635 | \$26.06 |
| Percent change | 58.094 | 132.041 | 14.2307 |
| Current total | 1382.362 | 183.704 | \$61,596.05 |
| Revise total | 1661.506 | 231.528 | \$70,079.06 |
| Difference | 279.144 | 47.824 | \$8,483.01 |
| Percent change | 30.177 | 8.821 | 6.0949 |

There was a significant increase in the weight, cube, and cost in the equipment category. This is in part attributable to items like the suction machine and the automatic external defibrillator that were added to satisfy tasks previously not performed due to materiel shortfalls in the inventory. These two items alone totaled nearly \$6,000.00.

The overall decrease in medication is due to the nature of packaging and consumption of these line items. High-value antibiotics like ceftriaxone sodium are provided in packages of 10 vials at \$207.25 per package. The patient stream called for 12 vials. If these items were supplied in lower UMs, by vial instead of package, a cost difference of \$186.48 would be realized for this one item. The benefits of reverting to low UM from UI can be seen throughout the inventory. For instance, haloperidol is supplied in packages of 10 ampules and the patient stream called for one ampule, and whereas 6 expensive bottles containing 100 tablets of 500-mg ciprofloxacin were stocked in the inventory (at \$187.00 each), the patient stream only called for 74 tablets, or 1 bottle, accounting for a savings of nearly \$1,000.00.

Another cost-saving potential would be to procure items in smaller packages or bottles. Prednisone 10-mg tablets are supplied in bottles of 500. The patient stream called for 12 tablets. Likewise, medications such as ibuprofen, sulfamethoxazole, trimethoprim, and diphenhydramine also come in bottles of 500. Of these items, ibuprofen was called for most, with a requirement of 128 tablets. Smaller bottles would result in notable savings in weight, cube, and cost.

In the consumable section, new items for required tasks not previously satisfied accounted for \$945.09. Other modest increases in items like bed pads and self-adhesive thermometers accounted for the balance of the increase. The principle difference in the consumable section between the actual consumption by the patient stream and the low UM is due largely to packaging. For instance, otoscope speculums come in packages of 1000 and were called for 20 times in the patient stream. This is also true for items in high-volume packages like syringes and needles, which are called for in relatively low numbers compared with the amount in the packages.

Discussion and Conclusion

The GRL inventory was mapped to joint solutions from the ESP database. Where there was no existing materiel solution in the GRL inventory for required tasks, supplies and equipment were added to fulfill the requirement. Simulation of the inventory was performed using a patient stream of 85 patients and PM task frequencies were derived from SME input. Vetting the recommended changes in the AS remains to be completed by the SME panel before a final configuration can be forwarded.

The 318 patient conditions and 10 PMOs were associated with 120 clinical, PM, and nonclinical tasks in the model. The PCs and PMOs were identified by the SMEs as the kind of patients and services expected to be provided by the GRL. These PCs, PMOs, and associated tasks were in keeping with the joint solutions in the ESP relational database.

The SME panel will review the recommended configuration and changes from the existing UTC configuration (additions, deletions, and quantity changes).

During this review process, ESP will be available for the SME panel to map back any materiel items to those specific clinical tasks and PCs they are intended to support. This phase will be completed at the discretion of Air Mobility Command MEFPAK Manager.

Exporting ESP capabilities to inventories other than those of the Navy and Marine Corps proved to be a viable method of evaluating other pre-existing medical systems' capabilities. In previous efforts, the inventories for the U.S. Air Force MFST and the CCATT UTCs have been successfully included in ESP and simulated using an appropriate patient stream. ESP determines appropriate stock levels for equipment and consumable supplies, and in this case, indicated that an increase of weight, cube, and cost was appropriate for the patient stream and the PM task frequencies. Estimation is critical for a highly mobile, people-transportable system like the GRL. ESP is also a highly effective tool with which to configure resupply packs, ensuring medical material sustainment across the spectrum of medical care facilities, while maintaining their clinical capability.

Additionally, the materiel solutions found in the relational database are instrumental in ensuring joint requirements are satisfied consistently throughout the services and are in keeping with standards of care for operational platforms.

Finally, the ESP simulation creates an audit trail establishing clinical requirements for supply items in medical system inventories that enable logisticians, medical planners, and MEFPAK members to validate current inventories and perform analyses of projected changes to future inventories. It also serves as a leading consumption indicator, making it easier to identify resupply requirements to ensure sustainment.

The ESP is an invaluable resource when building a new AS or when configuration management calls for modifying an existing AS. ESP can determine the materiel requirements for emerging systems and has been used to develop numerous systems for the Navy and Marine Corps, including FRSS and ERCS, currently fielded and deployed in support of troops. This program is essential in configuration management because a planner is able to see the impact of deleting an item across the spectrum of tasks in that FA. Moreover, SMEs can review task profiles to determine if a task is considered critical, and if not, they can modify the treatment profile. The same concept holds true for supplies. SMEs can review the supplies for a specific task and make a clinical judgment as to whether a line item should be removed as no longer necessary to the task, or if its amount should be either reduced or increased.

| Number | - |
| 001 | Cerebral Concussion Closed w/without Nondepressed Linear Skull Fracture Severe -Loss Of Consciousness from 2- 12 Hours |
| 002 | Cerebral Concussion Closed w/without Nondepressed Linear Skull Fracture Moderate -Loss Of Consciousness Less Than 2 Hours |
| 003 | Cerebral Contusion Closed w/without Nondepressed Linear Skull Fracture Severe -Loss Of Consciousness Greater Than 24 Hours w/ Focal Neurological Deficit |
| 004 | Cerebral Contusion Closed w/without Nondepressed Linear Skull Fracture Moderate -Loss Of Consciousness from 12-24 Hours Without Focal Neurological Deficit |
| 005 | Cerebral Contusion Closed w/ Intracranial Hematoma with/without Non- Depressed Linear Skull Fracture - Severe - Large Hematoma (including Epidural Hematoma) with Rapidly Deteriorating Comatose Patient |
| 006 | Cerebral Contusion Closed w/ Nondepressed Linear Skull Facture Severe -Loss Of Consciousness Greater Than 24 Hours with/without Focal Neurological Deficit |
| 007 | Cerebral Contusion Closed w/ Depressed Skull Fracture Severe - with Associated Intracerebral Hematoma and/or Massive Depression |
| 008 | Cerebral Contusion Closed w/ Depressed Skull Fracture Moderate -No Associated Hematoma or Significant Effect From Depression |
| 009 | Cerebral Contusion w/ Open Skull Fracture Severe - with Intracranial Fragments and/or Depressed Skull Fracture; Eyelid and Eyeball Laceration with Retained Intraocular Foreign Body |
| 010 | Cerebral Contusion w/ Open Skull Fracture Moderate - without Intracranial Fragments and/or Depressed Skull Fracture |
| 011 | Intracranial Hemorrhage Spontaneous Nontraumatic All Cases |
| 013 | Wound Scalp Open without Cerebral Injury or Skull Fracture Severe - Scalped w/Avulsion Of Tissue |
| 014 | Wound Scalp Open without Cerebral Injury or Skull Fracture Moderate - Scalp Laceration |
| 015 | Fracture Facial Bones Closed Exclusive Of Mandible Severe - Multiple Fractures |
| 016 | Fracture Facial Bones Closed Exclusive Of Mandible Moderate - Single Fracture |
| 017 | Wound Face Jaws and Neck Open Lacerated w/ Associated Fractures Excluding Spinal Fractures Severe - with Airway Obstruction |
| 018 | Wound Face Jaws and Neck Open Lacerated w/ Associated Fractures Excluding Spinal Fractures Moderate - Without Airway Obstruction; Eyelid and Eyeball Laceration w/ Retained Intraocular Foreign Body |
| 019 | Wound Face and Neck Open Lacerated Contused without Fractures Severe - w/ Airway Obstructions and/or Major Vessel Involvement |
| 020 | Wound Face and Neck Open Lacerated Contused without Fractures Moderate - without Airway Obstruction or Major Vessel Involvement |
| 021 | Eye Wound Severe -Loss Of Intraocular Fluid with/without Retinal Detachment, w/ Severe Lid Laceration, Eye Not Salvageable |
| 022 | Eye Wound Lacerated Moderate - without Retinal Detachment or Retinal Injury No Foreign Body Retained Without Loss Of Vitreous Fluid Patient has Hyphema Eye Salvageable |
| 023 | Hearing Impairment Severe |
| 024 | Hearing Impairment Moderate |
| 025 | Fracture Spine Closed without Cord Damage Unstable Lesion |
| 026 | Fracture Spine Closed without Cord Damage Stable Lesion |
| 027 | Fracture Spine Closed w/ Cord Damage Cervical Spine w/ Respiratory Involvement |
| 028 | Fracture Spine Closed w/ Cord Damage Below Cervical Spine (progressive) |
| 029 | Fracture Spine Open w/ Cord Damage Cervical Spine w/Respiratory Distress |
| 030 | Fracture Spine Open w/ Cord Damage Below Cervical Spine (progressive) |
| 031 | Intervertebral Disc Disorders w/ Nerve Root Compression Resistant To Bed Rest/traction |
| 032 | Intervertebral Disc Disorders w/ Nerve Root Compression Responding To Bed Rest/traction |
| 033 | Strains and Sprains Sacroiliac Region Severe - Non-ambulatory |
| 034 | Strains and Sprains Sacroiliac Region Moderate - Ambulatory |

Appendix B. Global Reach Laydown List of Patient Conditions and Preventive Medicine Objectives

| PC November | Patient Condition Description |
|----------------|--|
| Number | Burn Thermal Superficial Head and Neck Greater Than 5% but Less Than 10% of Total Body Area and/or Eye |
| 035 | Involvement |
| 036 | Burn Thermal Superficial Head and Neck Less Than 5% of Total Body Area and No Eye Involvement |
| 037 | Burn Thermal Partial Thickness Head and Neck Greater Than 5% but Less Than 10% Of Total Body Area and/or Eye Involvement |
| 038 | Burn Thermal Partial Thickness Head and Neck Less Than 5% of Total Body Area and No Eye Involvement |
| 039 | Burn Thermal Full Thickness Head and Neck Greater Than 5% but Less Than 10% of Total Body Area with Eye Involvement |
| 040 | Burn Thermal Full Thickness Head and Neck Less Than 5% of Total Body Area and No Eye Involvement |
| 041 | Fracture Clavicle Closed All Cases |
| 042 | Wound Shoulder Girdle Open w/ Bone Injury Severe - Joint Involvement |
| 043 | Wound Shoulder Girdle Open w/ Bone Injury Moderate - No Joint Involvement |
| 044 | Fracture Humerus Closed Upper Shaft All Cases |
| 045 | Wound Upper Arm Open Penetrating Lacerated without Fracture Severe - w/ Nerve and/or Vascular Injury |
| 046 | Wound Upper Arm Open Penetrating Lacerated without Fracture Moderate - without Nerve or Vascular Injury |
| 047 | Wound Upper Arm Open w/ Fractures and Nerve and Vascular Injury Arm Non-salvageable |
| 048 | Wound Upper Arm Open w/ Fractures and Nerve Injury No Vascular Injury Arm Salvageable |
| 049 | Fracture Radius and Ulna Closed Severe - Shafts Of Bones |
| 050 | Fracture Radius and Ulna Closed Moderate - Colles Fracture |
| 051 | Wound Forearm Open Lacerated Penetrating without Bone Nerve or Vascular Injury w/ Major Loss Of Muscle Tissue Severe - Requiring Major Debridement |
| 052 | Wound Forearm Open Lacerated Penetrating without Bone Nerve or Vascular Injury Moderate - Not Requiring Major Debridement |
| 053 | Wound Forearm Open Lacerated Penetrating w/ Fracture and w/ Nerve and Vascular Injury Forearm Not Salvageable |
| 054 | Wound Forearm Open Lacerated Penetrating w/ Fracture and w/ Nerve and Vascular Injury Forearm Salvageable |
| 055 | Fracture Hand or Fingers Closed Severe - Requiring Open Reduction |
| 056 | Fracture Hand and/or Fingers Closed Moderate - Not Requiring Closed Reduction |
| 057 | Wound Hand and/or Fingers Open Lacerated without Fractures Severe - Superficial and Deep Tendon Involvement |
| 058 | Wound Hand and/or Fingers Open Lacerated without Fractures Moderate - No Tendon Involvement or Limited to Sublimis Tendon Involvement |
| 059 | Wound Hand Open Lacerated Contused Crushed w/ Fracture(s) All Cases - Involving Fractures of Carpals and/or Metacarpals |
| 060 | Wound Fingers Open Lacerated Contused Crushed w/ Fracture(s) of Phalangeals Requiring Rehabilitation |
| 061 | Crush Injury Upper Extremity Severe - Limb Not Salvageable |
| 062 | Crush Injury Upper Extremity Moderate - Limb Salvageable |
| 064 | Dislocation Shoulder Closed All Cases |
| 065 | Dislocation/fracture Elbow Closed Acute All Cases |
| 067 | Dislocation Hand or Wrist Closed Acute |
| 068 | Dislocation Fingers Closed Acute |
| 069 | Amputation Hand Traumatic Complete All Cases |
| 070 | Amputation Forearm Traumatic Complete All Cases |
| 071 | Amputation Full Arm Traumatic Complete All Cases |
| 072 | Sprain Wrist Closed Acute All Cases |
| 073 | Sprain Thumb Closed Acute Severe |

Appendix B. Global Reach Laydown List of Patient Conditions and Preventive Medicine Objectives

| PC Number | Patient Condition Description |
|--------------|--|
| 074 | Sprain Fingers Closed Acute Moderate - No Thumb Involvement |
| 075 | Burn Thermal Superficial Upper Extremities Greater Than 10% but Less Than 20% of Total Body Area Involved |
| 076 | Burn Thermal Superficial Upper Extremity Less Than 10% of Total Body Area Involved |
| 077 | Burn Thermal Partial Thickness Upper Extremities Greater Than 10% but Less Than 20% of Total Body Area Involved |
| 078 | Burn Thermal Partial Thickness Upper Extremity Less Than 10% of Total Body Area Involved |
| 079 | Burn Thermal Full Thickness Upper Extremities Greater Than 10% but Less Than 20% of Total Body Area Involved |
| 080 | Burn Thermal Full Thickness Upper Extremity Less Than 10% of Total Body Area Involved |
| 081 | Fracture Ribs Closed Severe - Multiple Fractures |
| 082 | Fracture Rib(s) Closed Moderate |
| 083 | Injury Lung Closed (blast Crush) w/ Pneumohemothorax Severe - One Lung With Pulmonary Contusion and Acute Severe Respiratory Distress |
| 084 | Injury Lung Closed (blast Crush) w/ Pneumohemothorax Moderate - One Lung w/ Pulmonary Contusion and Respiratory Distress |
| 085 | Wound Thorax (anterior or posterior) Open Superficial Lacerated Contused Abraded Avulsed Requiring Major Debridement |
| 086 | Wound Thorax (anterior or posterior) Open Superficial Lacerated Contused Abraded Avulsed Not Requiring Major Debridement |
| 087 | Wound Thorax (anterior or posterior) Open Penetrating w/ Associated Rib Fractures and Pneumohemothorax Acute Severe Respiratory Distress |
| 088 | Wound Thorax (anterior or posterior) Open Penetrating w/ Associated Rib Fractures and Pneumohemothorax Moderate Respiratory Distress |
| 090 | Burn Thermal Superficial Trunk Greater Than 20% but Less Than 30% of Total Body Area Involved |
| 091 | Burn Thermal Superficial Trunk Greater Than 10% but Less Than 20% of Total Body Area Involved |
| 092 | Burn Thermal Partial Thickness Trunk Greater Than 20% but Less Than 30% of Total Body Area Involved |
| 093 | Burn Thermal Partial Thickness Trunk Greater Than 10% but Less Than 20% of Total Body Area Involved |
| 094 | Burn Thermal Full Thickness Trunk Greater Than 20% but Less Than 30% of Total Body Area Involved |
| 095 | Burn Thermal Full Thickness Trunk Greater Than 10% but Less Than 20% of Total Body Area Involved |
| 096 | Wound Abdominal Wall (anterior or posterior) Lacerated Abraded Contused Avulsed without Entering Abdominal Cavity Severe - Requiring Major Debridement |
| 097 | Wound Abdominal Wall (anterior or posterior) Lacerated Abraded Contused Avulsed without Entering Abdominal Cavity Not Requiring Major Debridement |
| 098 | Wound Liver Closed Acute (crush Fracture) Major Liver Damage |
| 099 | Wound Liver Closed Acute (crush Fracture) Minor Liver Damage |
| 100 | Wound Spleen Closed Acute (crush Fracture) All Cases |
| 101 | Wound Abdominal Cavity Open w/ Lacerating Penetrating Perforating Wound to Large Bowel |
| 102 | Wound Abdominal Cavity Open w/ Lacerating Penetrating Perforating Wound to Small Bowel without Major or Multiple Resections |
| 103 | Wound Abdominal Cavity Open w/ Penetrating Perforating Wound of Liver Major Damage |
| 104 | Wound Abdominal Cavity Open w/h Penetrating Perforating Abdominal Wound With Lacerated Liver |
| 105 | Wound Abdominal Cavity Open w/h Penetrating Perforating Wound of Spleen |
| 106 | Wound Abdominal Cavity Open w/ Lacerated Penetrated Preforated Wound w/ Shattered Kidney |
| 107 | Wound Abdominal Cavity Open w/ Lacerated Penetrating Perforating Wound w/ Lacerated Kidney Initially Repaired but Subsequent Nephrectomy |
| 108 | Wound Abdominal Cavity Open w/ Lacerated Penetrating Perforating Wound w/ Shattered Bladder |
| 109 | Wound Abdominal Cavity Open w/Lacerated Penetrating Perforating Wound w/ Lacerated Bladder |
| 110 | Wound Buttocks Severe - Open Lacerated Penetrating Perforating and Avulsed |

Appendix B. Global Reach Laydown List of Patient Conditions and Preventive Medicine Objectives

| PC Number | Patient Condition Description |
|--------------|---|
| 111 | Wound Buttocks Moderate - Open Lacerated Contused and Abraded |
| 112 | Displaced Fracture of Pelvis Closed With Associated Soft Tissue Damage and Pelvic Organ Damage |
| 113 | Non-displaced Fracture of Pelvis Closed With Associated Soft Tissue Damage |
| | Wound Abdomen Open w/ Pelvic Fracture and Penetrating Perforating Wounds to Multiple Pelvic Structures (male |
| 114 | or Female) |
| 115 | Wound Abdomen Open w/ Pelvic Fracture and Penetrating Perforating Wounds to Pelvic Colon Only (male or Female) |
| 116 | Wound External Genitalia Male Severe - Lacerated Avulsed Crushed |
| 117 | Wound External Genitalia Male Moderate - Abraded and Contused |
| 118 | Wound External Genitalia Female Severe - Lacerated Avulsed Crushed |
| 119 | Wound External Genitalia Female Moderate - Abraded Contused |
| 120 | Fracture Closed Femur Shaft All Cases |
| 121 | Wound Thigh Open without Fracture Nerve or Vascular Injury Requiring Major Debridement |
| 122 | Wound Thigh Open without Fracture Nerve or Vascular Injury Not Requiring Major Debridement |
| 123 | Wound Thigh Open Lacerated Penetrating Perforating w/ Fracture and Nerve/vascular Injury Limb Not Salvageable |
| 124 | Wound Thigh Open Lacerated Penetrating Perforating w/ Fracture and Nerve and/or Vascular Injury Limb Salvageable |
| 125 | Wound Knee Open Lacerated Penetrating Perforating w/ Joint Space Penetration Shattered Knee |
| 126 | Wound Knee Open Lacerated Penetrating Perforating w/ Joint Space Penetration Articular Cartilage Damage No Bone Injury |
| 127 | Fracture Closed Tibia and Fibula Shaft All Cases |
| 128 | Wound Lower Leg Open Lacerated Penetrating Perforating without Fractures Requiring Major Debridement |
| 129 | Wound Lower Leg Open Lacerated Penetrating Perforating without Fractures Not Requiring Major Debridement |
| 130 | Wound Lower Leg Open Lacerated Penetrating Perforating w/ Fracture and Nerve/vascular Injury Limb Not Salvageable |
| 131 | Wound Lower Leg Open Lacerated Penetrating Perforating w/ Fracture and Nerve and/or Vascular Injury Limb Salvageable |
| 132 | Fracture Ankle/foot Closed Displaced Requiring Reduction |
| 133 | Fracture Ankle/foot Closed Nondisplaced Not Requiring Reduction |
| 134 | Wound Ankle Foot Toes Open Lacerated Contused without Fractures but Requiring Major Debridement |
| 135 | Wound Ankle Foot Toes Open Lacerated Contused without Fractures Not Requiring Major Debridement |
| 136 | Wound Ankle Foot Toes Open Penetrating Perforating w/ Fractures and Nerve/vascular Injury Limb Not Salvageable |
| 137 | Wound Ankle Foot Toes Open Penetrating Perforating w/ Fractures and Nerve and/or Vascular Injury Limb Salvageable |
| 138 | Crush Injury Lower Extremity Limb Not Salvageable |
| 139 | Crush Injury Lower Extremity Limb Salvageable |
| 140 | Dislocation Hip Closed Acute All Cases |
| 141 | Tear Ligaments Knee Acute Complete Rupture |
| 142 | Tear Ligaments Knee Acute Incomplete Rupture |
| 143 | Dislocation Toes Closed Acute All Cases |
| 144 | Amputation Foot Traumatic Complete All Cases |
| 145 | Amputation Below Knee Traumatic Complete All Cases |
| 146 | Amputation Traumatic Complete Requiring Hip Disarticulation |
| 147 | Amputation Above Knee Traumatic Complete |

Appendix B. Global Reach Laydown List of Patient Conditions and Preventive Medicine Objectives

| PC Number | Patient Condition Description |
|--------------|---|
| 148 | Sprain Ankle Closed Acute With Complete Ligament Rupture |
| 149 | Sprain Ankle Closed Acute Grade 2 Incomplete Ligament Rupture |
| 150 | Burn Thermal Superficial Lower Extremities and Genitalia Greater Than 30% but Less Than 40% of Total Body Area Involved |
| 151 | Burn Thermal Superficial Lower Extremity and Genitalia Greater Than 15% but Less Than 30% of Total Body Area Involved |
| 152 | Burn Thermal Partial Thickness Lower Extremities and Genitalia Greater Than 30% but Less Than 40% of Total Body Area Involved |
| 153 | Burn Thermal Partial Thickness Lower Extremity and Genitalia Greater Than 15% but Less Than 30% of Total Body Area Involved |
| 154 | Burn Thermal Full Thickness Lower Extremities and Genitalia Greater Than 30% but Less Than 40% of Total Body Area Involved |
| 155 | Burn Thermal Full Thickness Lower Extremity and Genitalia Greater Than 15% but Less Than 30% of Total Body Area Involved |
| 156 | Blisters Hand Fingers Foot Toes Due to Friction Acute Moderate - All Cases |
| 157 | Insect Bites and Stings (unspecified Body Area) w/ Systemic Symptoms and/or Respiratory Difficulty |
| 158 | Bites and Stings (unspecified Body Area) Moderate - Localized Symptoms |
| 159 | Miw Brain and Chest w/ Sucking Chest Wound and Pneumohemothorax |
| 160 | Miw Brain and Abdomen w/ Penetrating Perforating Wound Colon |
| 161 | Miw Brain and Abdomen w/ Penetrating Perforating Wound Kidney |
| 162 | Miw Brain and Abdomen w/ Penetrating Perforating Wound Bladder |
| 163 | Miw Brain and Abdomen w/ Shock and Penetrating Perforating Wound Spleen |
| 164 | Miw Brain and Abdomen w/ Shock and Penetrating Perforating Wound Liver |
| 165 | Miw Brain and Lower Limbs Requiring Bilateral Above Knee Amputations |
| 166 | Miw Chest w/ Pneumohemothorax and Abdomen w/ Penetrating Wound Colon |
| 167 | Miw Chest w/ Pneumohemothorax and Abdomen w/ Penetrating Perforating Wound Kidney |
| 168 | Miw Chest w/ Pneumohemothorax and Abdomen w/ Perforating Wound Bladder |
| 169 | Miw Chest w/ Pneumohemothorax and Abdomen w/ Penetrating Perforating Wound Spleen |
| 170 | Miw Chest w/ Pneumohemothorax and Abdomen w/ Penetrating Perforating Wound Liver |
| 171 | Miw Chest w/ Pneumohemothorax and Limbs w/ Fracture and Vascular Injury |
| 172 | Miw Abdomen w/ Penetrating Perforating Wound of Colon and Bladder |
| 173 | Miw Abdomen w/ Penetrating Perforating Wound of Colon and Spleen |
| 174 | Miw Abdomen w/ Penetrating Perforating Wound of Colon and Liver |
| 175 | Miw Abdomen and Limbs w/ Penetrating Perforating Wound of Colon and Open Fracture and Neurovascular Injury of Salvageable Lower Limb |
| 176 | Miw Abdomen and Pelvis w/ Penetrating Perforating Wound of Liver and Kidney |
| 177 | Miw Abdomen and Pelvis w/ Penetrating Perforating Wounds of Spleen and Bladder |
| 178 | Miw Abdomen Pelvis Limbs w/ Fracture and Neurovascular Injury Limb Salvageable and Penetrating Wound Kidney |
| 179 | Miw Abdomen Pelvis Limbs without Fracture or Neurovascular Injury and Penetrating Perforating Wound Bladder |
| 180 | Miw Abdomen and Lower Limbs w/ Fracture and Nerve Injury w/ Penetrating Wound of Spleen w/ Full Thickness Burns To Greater Than 20% of Tbsa |
| 181 | Miw Abdomen and Limbs without Fracture or Nerve Injury w/ Penetrating Wound of Liver |
| 182 | Miw Chest w/ Pneumohemothorax Soft Tissue Injury to Upper Limbs and Penetrating Wound of Brain |
| 183 | Miw Chest w/ Pneumohemothorax Soft Tissue Injury to Upper Limbs and Abdomen w/ Wound Of Colon |
| 184 | Miw Chest w/ Pneumohemothorax Pelvis and Abdomen w/ Wound of Colon and Bladder |

Appendix B. Global Reach Laydown List of Patient Conditions and Preventive Medicine Objectives

| PC Number | Patient Condition Description |
|--------------|--|
| 185 | MIW Abdomen and Chest w/ Multiple Organ Damage |
| 186 | Multiple Nonperforating Fragment Wounds of Skin and Soft Tissue |
| 187 | Trench Foot Immersion Foot Severe - Vesicle Formation |
| 188 | Trench Foot Immersion Foot Moderate - No Vesicle Formation |
| 190 | Frostbite Full Skin Thickness or Deeper Involvement |
| 191 | Frostbite Less Than Full Skin Thickness |
| 192 | Hypothermia All Cases |
| 193 | Heat Stroke |
| 194 | Heat Exhaustion |
| 195 | Heat Cramps All Cases |
| 196 | Appendicitis Acute w/ Perforation Rupture Peritonitis |
| 197 | Appendicitis Acute without Perforation Rupture Peritonitis |
| 198 | Inguinal Hernia Complicated Direct or Indirect Sliding Incarceration of Bowel |
| 199 | Inguinal Hernia Uncomplicated Direct or Indirect No Sliding No Incarceration of Bowel or Bladder |
| 200 | Internal Derangement of Knee Chronic w/ Torn Meniscus and/or Ligament Laxity |
| 201 | Strain Lumbosacral Sacroiliac Joint Chronic All Cases |
| 202 | Eczema Dermatitis Seborrheic Contact Others Affecting Weight Bearing or Pressure Areas |
| 203 | Eczema Dermatitis Seborrheic Contact Others Not Affecting Weight Bearing Areas |
| 204 | Boils Furuncles Pyoderma Requiring Surgery |
| 205 | Boils Furuncles Pyoderma All Other Cases Calluses Corns Folliculitis Erythrasma |
| 206 | Cellulitis Involving Face or Weight Bearing Areas |
| 207 | Cellulitis Other Than Face or Weight Bearing Areas |
| 208 | Dermatophytosis Severe - Affecting Feet |
| 209 | Dermatophytosis All Other Cases (tineas/candidas/yeasts) |
| 210 | Pediculosis All Cases |
| 211 | Scabies All Cases |
| 212 | Pilonidal Cyst/abscess Requiring Major Excision |
| 213 | Cyst/abscess Allcases Including Minor Incision |
| 214 | Ingrown Toenails Bilateral w/ Secondary Infections Unresolvable At Echelon 2 |
| 215 | Ingrown Toenails without Secondary Infection |
| 216 | Herpes Simplex and Zoster without Encephalitis All Types Of Viral Dermatitis |
| 219 | Hyperhidrosis All Cases |
| 220 | Blepharitis All Cases |
| 221 | Conjunctivitis Severe - All Cases |
| 222 | Conjunctivitis Moderate - All Cases |
| 223 | Corneal Ulcer |
| 224 | Corneal Abrasion |
| 225 | Iridocyclitis Acute Marked Visual Impairment |
| 226 | Iridocyclitis Acute Minimal Visual Impairment |
| 227 | Refraction and Accommodation Disorders Refraction Required |
| 228 | Refraction and Accommodation Disorders Replacement of Spectacles Required |
| 229 | Otitis Externa All Cases |

Appendix B. Global Reach Laydown List of Patient Conditions and Preventive Medicine Objectives

| PC Number | Patient Condition Description |
|--------------|--|
| 230 | Otitis Media Acute Suppurative Including Eustacian Tubes |
| 232 | Infections Of The Nose & Paranasal Sinuses Including Viral Rhinitis |
| 233 | Upper Respiratory Infections Acute All Cases |
| 234 | Bronchitis Acute All Cases |
| 235 | Asthma With Disabling Symptoms or Repeated Attacks |
| 236 | Asthma Other Cases |
| 239 | Acute Respiratory Disease Severe |
| 240 | Acute Respiratory Disease Moderate |
| 243 | Food Poisoning All Organisms Disabling Symptoms |
| 244 | Food Poisoning All Organisms Moderate Symptoms |
| 245 | Diarrheal Disease Severe |
| 246 | Diarrheal Disease Moderate |
| 247 | Upper Gastrointestinal Hemorrhage, Gastritis or Ulcer |
| 248 | Gastritis Acute All Cases |
| 249 | Peptic Ulcer Gastric or Duodenal Penetrating and/or Perforating |
| 250 | Peptic Ulcer Gastric or Duodenal Uncomplicated |
| 251 | Regional Ileitis Disabling Symptoms Unresponsive To Treatment |
| 252 | Regional Ileitis Responds to Treatment |
| 253 | Helminthic Disease Including Trichinosis Ascariasis Giardiasis Tapeworm Hookworm Pinworm |
| 255 | Migraine All Cases |
| 256 | Hemorrhoidal Disease All Cases |
| 258 | Severe Hypertension |
| 259 | Ischemic Heart Disease |
| 260 | Phlebitis Deep Vein Involvement |
| 262 | Tenosynovitis Tendonitis Bursistis Epicondylitis |
| 263 | Meningo-encephalitis Uncomplicated |
| 264 | Meningo-encephalitis Complicated |
| 265 | Near Drowning without Cervical Spine Injury or Hypothermia All Cases |
| 266 | Toxic Inhalation Including Burn-related Respiratory Injuries Severe - All Cases |
| 268 | White Phosphorus Burns Resultant Partial Thickness Burns < 40% Tbsa All Cases |
| 269 | Sexually Transmitted Disease, Nsu, Macupurulent, Cervicitis, Tricomonas |
| 270 | Sexually Transmitted Disease, Genital Ulcers, Adenopathy, Chancroid, Genital Herpes Simplex, Lymphogranuloma, Venereuem, Syphillis |
| 271 | Sexually Transmitted Disease, Gonorrhea, Chlamydia, Septic Arthritis, Pid |
| 272 | Glomerulonephritis Acute |
| 273 | Glomerulonephritis Chronic |
| 274 | Pyelonephritis Acute Secondary To Obstruction |
| 275 | Pyelonephritis Acute No Obstruction |
| 276 | Nephrotic Syndrome/Renal Failure All Cases |
| 277 | Renal/ureteral Calculus Causing Obstruction Impacted |
| 278 | Renal/ureteral Calculus Not Causing Obstruction |
| 279 | Epididymitis, Cystitis, Prostatitis, Orchitis, Including Testicular Torsion, All Cases |

Appendix B. Global Reach Laydown List of Patient Conditions and Preventive Medicine Objectives

| PC Number | Patient Condition Description |
|--------------|--|
| 280 | Balanoposthitis All Cases |
| 282 | Infectious Mononucleosis All Cases |
| 283 | Hepatitis Infectious Viral All Cases |
| 285 | Cholecystitis Acute w/ Stones/cholecystitis All Cases |
| 286 | Pancreatitis Acute All Cases |
| 287 | Cirrhosis All Cases |
| 289 | Neoplasms Malignant |
| 290 | Neoplasms Benign |
| 291 | Abnormal Uterine Bleeding |
| 292 | Dysmenorrhea Amenorrhea |
| 293 | Pelvic Inflammatory Disease (pid) All Cases |
| 294 | Cervicitis Endocervicitis With Symptomatic Leukorrhea |
| 295 | Vulvovaginitis |
| 297 | Tubal Pregnancy All Cases |
| 299 | Abortion Spontaneous With Hemorrhage |
| 301 | Psychosis |
| 302 | Conduct Disorders |
| 303 | Non-psychotic Mental Disorders |
| 304 | Stress Reaction Severe Unstable Slow Improvement |
| 305 | Stress Reaction Severe Stable Slow Improvement |
| 306 | Alcohol Dependency Syndrome Moderate |
| 307 | Alcohol Misuse Simple Intoxication |
| 308 | Drug Dependency (other Than Alcohol) Severe |
| 309 | Drug Misuse (other Than Alcohol) Mild or Moderate |
| 310 | Stress Reaction Mild/moderate |
| 311 | Eye Wound Lacerated Penetrated w/ Retinal Injury Eye Salvageable |
| 312 | Wound Knee Open Lacerated Penetrating Perforating w/ Joint Space Penetration No Bone or Articular Cartilage Injury |
| 313 | Wound Abdominal Cavity Open w/ Lacerated Penetrating Perforating Wound Kidney Moderate - Kidney Salvageable |
| 314 | Stress Reaction Severe Unstable Delayed Improvement |
| 315 | Stress Reaction Severe Unstable Persisting |
| 316 | Alcohol Dependency Severe - Impending or Actual Dts |
| 317 | Drug Misuse (other Than Alcohol) Severe - Atypical No Dependency |
| 318 | Stress Reaction Severe - Rapid Improvement |
| 319 | Wound Fingers Open Lacerated Contused Crushed w/ Fracture(s) of Phalangeals Not Requiring Rehabilitation |
| 320 | Dislocation/subluxation Temporomandibular Joint without Fracture Chronic Requiring Correction |
| 321 | Dislocation/subluxation Temporomandibular Joint without Fracture Acute Initial Injury |
| 322 | Fracture Mandible with/without oral Laceration without Airway Involvement Unstable Severe Requiring Open Reduction |
| 323 | Fracture Mandible with/without oral Laceration without Airway Involvement Mild Displacement Stable |
| 324 | Stress Reaction Severe Stable - Delayed Improvement |
| 325 | Stress Reaction Severe Stable Persisting |

Appendix B. Global Reach Laydown List of Patient Conditions and Preventive Medicine Objectives

| PC Number | Patient Condition Description |
|--------------|---|
| 328 | Animal Bites and Rabies Exposure |
| 329 | Trachoma All Cases |
| 330 | Schistosomiasis All Cases |
| 331 | Malaria Severe - All Species |
| 332 | Malaria Moderate - All Species |
| 333 | Febrile Illness Acute Severe - Except Malaria and Pneumonia |
| 334 | Febrile Illness Acute Moderate |
| 335 | Snake Bite |
| 339 | Cutaneous Ulcers Including Leishmaniasis |
| 346 | Eye Wound Directed Energy Induced (laser) Severe of Macula and/or Optic Nerve, w/ Vitreous Blood, Severe Visual Lose, One or Both Eyes. |
| 347 | Eye Wound Directed Energy Induced (laser/rfr) Moderate to Severe, Posterior, Nonmacular, Nonoptic Nerve, Visual Loss Secondary to Vitreous Blood. |
| 348 | Eye Wound Directed Energy Induced (laser) Moderate Nonmacular, Nonoptic Nerve, No Vitreous Blood. |
| 349 | Eye Wound Directed Energy Induced (laser/rfr) Mild to Moderate, Anterior, Pain w/ Photophobia and Disruption of Corneal Integrity. |
| 350 | Eye Wound Directed Energy Induced (laser/rfr) Mild Flash Blindness No Permanent Injury |

| PMO Number | Preventive Medicine Objective |
|---------------|-------------------------------|
| 950 | Water Sanitation |
| 951 | Pest Control |
| 952 | Heat/Cold Injury Prevention |
| 953 | Communicable Disease Control |
| 954 | Food Sanitation |
| 955 | Common Area Sanitation |
| 956 | Berthing Sanitation |
| 957 | Waste Management |
| 958 | Conduct Training |

13. SUPPLEMENTARY NOTES

14. ABSTRACT (maximum 200 words)

The Air Force Medical Support Agency, Surgeon General Support Logistics Office requested the naval Health Research Center (NHRC) conduct a proof-of-concept study to assess the validity and feasibility of using NHRC's medical modeling tool for the development and management of Air Force medical Allowance Standards (AS). The Global Reach Laydown (GRL) Unit Type Code (UTC) AS was selected as the final of 3 UTCs. The objective of this study was to provide the Air Force with the ability to validate the clinical and preventive medicine (PM) requirements of the GRL AS, with the goal of using the NHRC model and database to establish an audit trail linking clinical requirements with supply items. Following NHRC's process of modeling clinical requirements, the Estimating Supplies Program database of task and supply profiles was the template used to complete the relational mapping of patient conditions to clinical tasks, medical equipment and supplies, and to identify 120 clinical, PM, and nonclinical tasks required by the GRL. A result of this effort was mapping the GRL inventory to joint solutions. There were shortfalls in the tasks required for this level of care, most notably those associated with nasogastric insertion and suction, chest tube suction, and cardiopulmonary resuscitation. When a required task did not have supplies and equipment in the GRL inventory, they were added to the model.
